

A fresh look at your traditional negative pressure wound therapy (tNPWT) needs

It's essential to assess all parts of the NPWT solution. NPWT tubing is an **important part of the solution**:

PUMP + TUBING + PORT + FOAM or GAUZE

When choosing your tNPWT, ask these **important questions**:

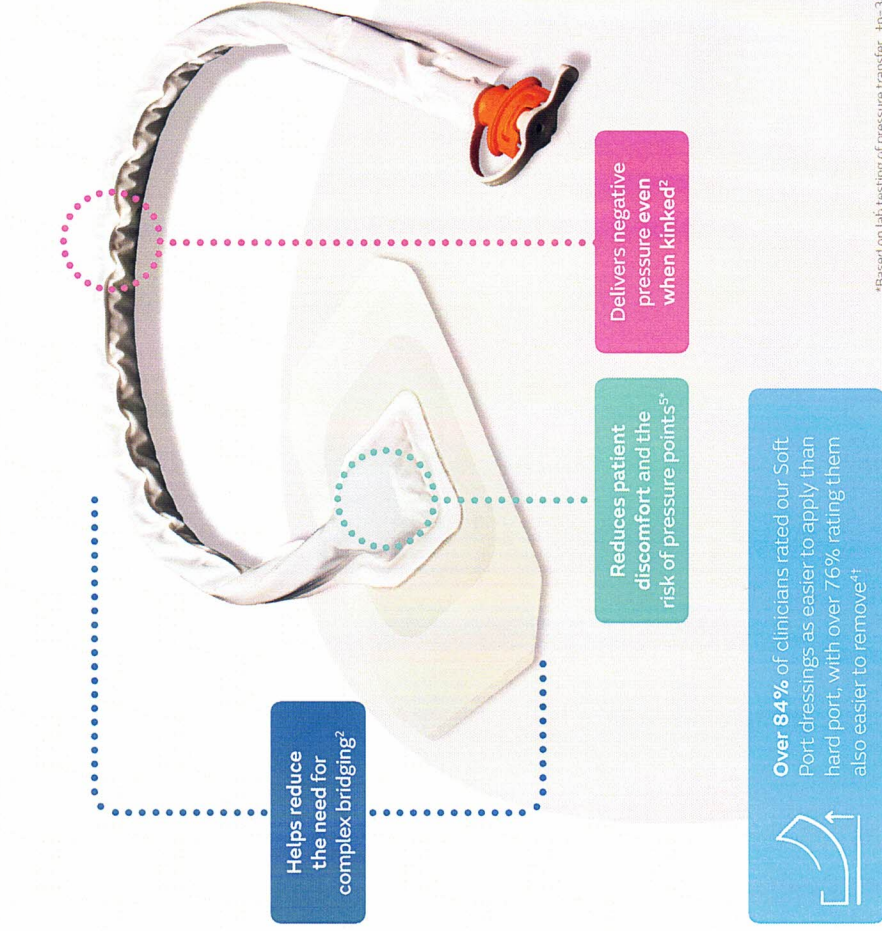

*n=96; Compared to alternative port †Based on lab testing of pressure transfer

A closer look at the RENASYS Soft Port

Our **RENASYS** Soft Port replaces traditional plastic tubing with a soft, conformable, compression resistant alternative.^{2,4} Use our Soft Port to ensure the chosen vacuum is **delivered to the wound**.

Our **RENASYS** Soft Port technology:

*Based on lab testing of pressure transfer †n=38
